Senior management sponsor	Rob Gregory	Rob Cantwell
CVST Administrator	Lisa Escalera	Amber Henes
Communications	John Britton	Jerry Holloway
HPMC	Dr. Sandy Rock	
Visitors	Visitors	Visitors

The Chemical Vapor Solutions Team (CVST) met on November 9, 2016. The above attendee list identifies CVST voting members, delegates, support staff, presenters, and guests in attendance.

Lisa, make sure that all voting members have name cards
 Lisa, next CVST is Tech Tours, - send invites out to everyone who is on the Roster

- Rob Gregory - Briefing on Program
- HAMMER involvement was missed as an opportunity
- Had a workshop with HAZWPER steering committee and leaders. Recognized that Chemical awareness is a big part of HAZWPR, and should be included.
- We've committed to giving all those leaders/trainers CHAT training and go on AP farm Tour for new tech

CVST 11/09/16 Minutes

- Building a strategy for how to use HAMMER to help us educate workers on chemical awareness
- Litigation - Decision that WA state had to stay in the lawsuit - DOJ had filed that WA state doesn't meet procedural requirements for lawsuit
- Still waiting on the preliminary injunction
- Once the injunction is determined, we'll meet with CVST to walk the team through
- We anticipate that we'll have a ruling by Nov 24th
- Plaintiffs citizen's group sent out a notice for depositions
- Preparations for depositions are not trivial or short

- Joel
- Look ahead in next few meetings
- Go over vapor team work products exec summary
- CPPO overview
- Visit website

- Lab Presentation
- Who gets a bottle assigned to them is still TBD
- Tyler Stoner will make the decision on who gets assigned
- Turnaround time for canisters in AOP event - we drop everything and do first - time depends, but for AOP even, it should take about 1-2 days to run in lab, and another 2-3 days to interpret what's there. The more complex the sample, the longer it will take

- Vapor management briefing - Rob Gregory
- Why don't we have 20-25 craft assigned to attend CVST
- How do we get West area involved?
- Short of a job assignment, Gregory will look at how to get more craft involved
- HPMC presented on what they do when evaluating a patient. Expected to have an action, but no dice. VMEP encourages that we do it
- **ACTION - Sandy Rock** - Present to the CVST on what the process is to evaluate a patient - what HPMC evaluate when looking at data from testing after AOP-015 (long term and short term)

- Geary's action - still working
- Update on chem cartridge from 3rd party - contract is in place, targeting done December 7.
- EA-32 draft report - may see the finalized report in a few weeks
- NIOSH report 1-2 week of December. May do a site visit after the report is issued.
